

Superstore Sales Dashboard using Power BI

This project is an interactive business intelligence dashboard developed using Power BI and the Superstore dataset. The dashboard helps analyze sales performance, profit trends, customer behavior, product performance, regional analysis, and shipping insights.

Objectives

- Analyze sales and profit performance
- Identify top products and customers
- Compare regional performance
- Study shipping trends
- Create interactive dashboards for decision-making

Tools Used

- Power BI Desktop
- DAX Measures
- Power Query
- Superstore Dataset

KPIs Used

- Total Sales
- Total Profit
- Total Orders
- Profit Margin Percentage
- Total Customers
- Average Shipping Days
- Total Quantity Sold

Dashboard Details

Dashboard 1 — Executive Overview

- Monthly Sales Trend
- Total Sales by Region
- Total Profit by Category
- Total Sales by Product Name

Dashboard 2 — Sales & Profit Analysis

- Monthly Sales Trend
- Monthly Profit Trend
- Sales by Category
- Profit by Sub-Category

Dashboard 3 — Product & Customer Analysis

- Top Customers by Sales
- Top Products by Sales
- Sales by Segment
- Customer Order Trend

Dashboard 4 — Regional & Shipping Analysis

- Sales by State Map
- Sales by Region
- Profit by Region
- Shipping Mode Analysis
- Shipping Trend

Dashboard 5 — Customer & Product Insights

- Customer Insights
- Product Insights
- Segment Analysis
- Trend Analysis

Important DAX Measures

Measure	Formula
Total Sales	SUM(Orders[Sales])
Total Profit	SUM(Orders[Profit])
Total Orders	DISTINCTCOUNT(Orders[Order ID])
Total Customers	DISTINCTCOUNT(Orders[Customer ID])
Total Quantity	SUM(Orders[Quantity])

The project successfully demonstrates the use of Power BI for creating professional business intelligence dashboards. The dashboards provide interactive analytics and meaningful insights that support business decision-making.
